Grand Blanc, MI | (231) 493-8459 | drewhuxley01@gmail.com

PROFESSIONAL SUMMARY

Data Analytics Intern and Computer Science student with hands-on experience building ETL pipelines, integrating REST APIs, and designing Power BI dashboards that turn raw data into actionable reporting. Skilled in SQL, data modeling, and translating cross-functional business requirements into analytics solutions. Background in performance analysis and CRM analytics from prior client-facing roles. Seeking an internship or entry-level role in Data Analytics or Business Intelligence.

EDUCATION & CERTIFICATIONS

University of Michigan – Flint — Bachelor of Science in Computer Science, Expected Graduation: April 2028

Google IT Support Professional Certificate

Project Management Specialization Certificate — University of Colorado Boulder

WORK EXPERIENCE

American Battery Solutions — Data Analytics Intern *May 2026 – August 2026*

- Engineered an ETL pipeline integrating Zabbix and Service Desk Plus REST APIs into SQL Server, including schema design to flatten nested JSON data for reporting
- Designed and built a multi-page Power BI infrastructure monitoring dashboard (Overview, Host Detail, Problem Trends) featuring drillthrough navigation, conditional formatting for severity tiers, and SLA availability metrics
- Communicated with cross-functional teams and stakeholders to align project scope, timelines, and reporting requirements

AAA Auto Club Group — Regional Insurance Specialist *April 2022 – March 2024*

- Analyzed performance data to identify inefficiencies and improve workflows
- Ranked in the top 10% of regional teams based on KPIs and sales metrics
- Maintained accurate documentation and reporting to support compliance and performance tracking
- Collaborated with cross-functional teams to improve customer service outcomes

State Farm — Insurance Agent *May 2021 – February 2022*

- Used Salesforce CRM and analytics to identify trends, risks, and potential process improvements
- Prepared and maintained detailed documentation to ensure regulatory compliance and data accuracy
- Managed commercial and individual insurance accounts

Starbucks — Barista *August 2019 – May 2021*

- Delivered customer service in a high-volume environment
- Communicated task assignments and resolved service issues to reduce delays during peak hours

PROJECTS

Infrastructure Monitoring ETL Pipeline & Power BI Dashboard *American Battery Solutions*

- Architected an ETL pipeline (hawkeye_etl) pulling infrastructure and ticketing data from Zabbix and Service Desk Plus REST APIs into a SQL Server backend, including schema design to flatten nested JSON into relational reporting tables
- Built a 3-page Power BI report (Overview, Host Detail, Problem Trends) with drillthrough navigation, dropdown slicers, conditional formatting for severity tiers, and SLA availability metrics
- Planned and sized supporting infrastructure (Hyper-V VM running Windows Server and SQL Server 2022) to support production deployment of the pipeline

CardMap — MTG Card Availability & Store Locator *Personal Project*

- Built a full-stack web app (React, TypeScript, Vite, Supabase/PostgreSQL with PostGIS) enabling users to search Magic: The Gathering card availability across local game stores by ZIP code or GPS location
- Developed Python scrapers to ingest live inventory from multiple e-commerce platforms (Shopify/BinderPOS, TCGplayerPro) into the Postgres backend, with full-text search and trigram-similarity fallback for fuzzy card-name matching
- Implemented a serverless reverse-geocoding endpoint with multi-provider fallback (BigDataCloud, Nominatim) for GPS-based search, plus Postgres Row-Level Security policies and RPC functions supporting a decklist import feature

SKILLS

Data Analytics & Tools: Power BI (DAX, Power Query), SQL Server, PostgreSQL, ETL pipeline development, REST API integration, Salesforce CRM & analytics

Programming: Python, SQL, R

Professional: Technical documentation, cross-functional collaboration, stakeholder communication, process improvement
